

## Quillio Code Repository:

Team 7: Anoop Jain, Ammar Husain, Prashanth Koushik, Charlie Crouse, Jiwon “Daniel” Kim, Jenna Ellis

The code repository for Quillio is located at <https://github.com/quillio307/quillio>, a publicly available organization and repository. The code base can be accessed via typical git clone protocol after being added to the organization.

The Quillio Project Charter and Product Backlog can be found in this repository, along with all other important documents that will be created as the semester progresses (Design Document, Sprint Planning Documents, and Retrospectives).

Our project coordinator, Aviral Mansingka, has access to the git repository.
